1. Why do we choose India?

1.1 India’s Worldwide Profile

1.2 Major Health Problems in India

1.3 Health Care System in India

2. Why do we choose Ganges Valley?

2.1 Ganges Valley’s Present Situation

2.2 Ganges and Medical Resources

2.3 Ganges and Indian Culture

3. Why do we choose Bihar State?

3.1 Medical Resources in Bihar

3.2 Space Form and Traffic in Bihar

3.3 Climate in Bihar

4. Why do we start with town & countryside?

4.1 Imbalance between Urban and Rural Medical Resources

4.2 Model of CHCs Location Selection

4.3 Settlement Types and Site Selection
5. How do we establish basic layout patterns?

The site layout mentioned in a circle followed by a square is a design for a ‘village pattern’ in which buildings are arranged in a grid-like manner. This pattern is useful in areas where space is limited and requires efficient use of land. The rectangular shape with four sides equal to each other ensures uniformity and balance, which is aesthetically pleasing and efficient in terms of space utilization.

6. How do we do pattern design?

The healing mandala is a symbols that represent a holistic approach to healing and well-being. The design reflects the idea of harmony and balance, which is important in creating a therapeutic environment.

7. How do we do practical design? (exp.: Giriya, Bihar)

The first floor plan provides a detailed view of the layout of the building, including rooms and their functions. The structural analysis shows the different components of the building and their interconnections, which is crucial for understanding the overall stability and functionality of the structure. The master plan of the area provides a comprehensive view of the site, including the surrounding environment and infrastructure, which is essential for planning and development.
